

Press Release

Estepona, 25. September 2007

After Price Break TerraSip ranks now as No. 2 of the TOP 100 VoIP Providers in the World

[Members enjoy 10-50 % reduction in rates and free destinations to landline.](#)

TerraSip, an International VoIP Community, dropped down most rates to international destinations. Especially calls to mobile destinations are with high reductions. The new price list placed TerraSip on Rank 2 in the VoIP Provider World Ranking of www.myvoipprovider.com

Phonecalls with friends and family worldwide for free

Since ever TerraSip members make free calls to one another worldwide and at very low call rates when phoning non-members, without any commitment to a contract, no monthly fees, no membership charges, and no hidden costs. Memberships are free of charge as well.

Phonecalls to regular landlines in various destinations for free

Now TerraSip started a trial period where even landlines can be called for free, as long as a member account at least has 1 ct credit, for example to Argentina, Brazil, Canada, China, Germany, India, Italy, Russia, United Kingdom, USA.

A complete list of free destinations is available on the TerraSip homepage.

No computer required for Internet Telephony

“Most users download the free Phoner, a comfortable softphone, for making calls from the computer,” says Susan Scheiber, responsible for Customer Service at TerraSip.

But apart from that, there is not necessarily a computer needed to do calls like other services require. Using special phones called IP phones, TerraSip makes Internet Telephony simple for users.

As an alternative to an IP phone an adapter enables the normal phone to be VoIP capable. At a push of a button the user determines whether to take advantage of free Internet Telephony or his normal service provider whenever making outgoing calls.

No VoIP phone required for Internet Telephony

Members using a computer but preferring making calls with a normal telephone can use the Phone2Phone service on the TerraSip homepage. Phone2Phone connects 2 normal landlines or mobiles with one another at the low rates of VoIP, but without the necessity of any additional hardware, software, installation or configuration.

About the Companies:

TerraSip is a young, internationally oriented company operating throughout the globe, a private held VoIP Provider based in Spain with an international team of software developers in Germany, Spain, California, Romania and India. TerraSip offers cheap high quality VoIP telephony and value added solutions based on Voice over IP, such as Callshop Management Software, Free Call Buttons, Phone2Phone solutions, SMS - Service and more.

TerraSip's main orientation is in the direction of mobile internet telephony: Voice over WLAN or VoWLAN for short.
